Modular Drawers in V-Grip™ Shelving

- Small parts are stored ergonomically in the "gold zone" (between shoulders and knees) for easy access
- Bulk storage space for larger items is available above and below the drawers
- 100% drawer extension provides full drawer access
- 200 lb. (36" width) and 400 lb. (36" width and 48" width) capacities available
- Each drawer is individually mounted to the V-Grip™ upright posts utilizing Equipto's exclusive bracket system
- Drawers are individually adjustable and can be added at any time without disassembly of the unit.
- Reflective White back and side panels enhance visibility

GOLD ZONE

The same versatile V-Grip™ design that gives you the flexibility to add wire shelving and lockable cabinets can also be configured so that all your modular drawers are between your shoulders and knees, or in the "GOLD ZONE". Consequently, there's no squatting, stretching or straining to store and retrieve parts and tools.

V-Grip™ Shelving - components

Structural Integrity comes from the integration of Equipto's exclusive V-Grip™ upright post and heavy-duty, compression-fit components.

When ordering V-Grip™ shelving by component, remember:

- 1) Shelving uprights can be shared and any number of units can be joined together in continuous row applications. A complete run of shelving only grows 1^{5/8"} no matter the length of the run.
- 2) Back sway braces and solid back panels can be shared between back-to-back units.
- 3) Closed shelving ends and solid back panels are finished in standard reflective white paint to enhance visibility in parts storage areas.
- 4) V-Grip™ shelves are heavy duty, 18-gauge steel and are provided with 4 corner reinforcements per shelf, which provide a friction fit to V-Grip™ upright posts.

V-Grip™ Bulk Rack

V-Grip™ Bulk Rack is designed to accommodate longer spans and heavier loads than conventional shelving. Bulk rack beams engage V-Grip upright posts providing a rigid connection. Bulk rack levels are designed to carry load capacities from 1500 lbs. to 3000 lbs. per level, depending on beam span length and deck material used.
