

Does your golf club storage area look like this?

Introducing Clubstor by Equipto; a flexible golf bag storage system that can both organize your storage and reduce the amount of space you need with our static or mobile storage units.

Recently updated and improved, Clubstor units are in hundreds of private and public golf clubs and driving ranges in the United States. Please [click here](#) for our four-page brochure describing the various sizes and options available. Designed to handle everything from a junior bag to touring bags and everything in between, it can organize your club storage room overnight. In addition, we offer a variety of other storage products including a spare club rack for driving ranges and "club loaner" situations and club repair work stations.

Please contact Les Farr at 214-300-9980 or lfarr@equipto.com to get a quote or a free consultation for your clubhouse, pro shop or other storage requirements.
