

EQUIPTO[®]

**INNOVATIVE APPROACHES TO
CUSTOM STORAGE SOLUTIONS**

ABOUT US...

Equipto is a privately held, small business manufacturer that has been a leader in space solutions since 1907. We proudly offer customized space and storage solutions to a wide range of industries that include distribution centers, warehouses, transit authorities, oil and gas, healthcare, education, manufacturing, and military. As the company grows and flourishes, new products and systems are being introduced to meet the demands of our customers. We provide installation services with Equipto trained employees nationally and internationally. All products are manufactured in Tatamy, PA; products that we are proud to stand behind and guarantee.

OUR VALUE PROPOSITION TO OUR CUSTOMERS

Layout – Our professionals will go to each site and work with our customers to lay out a storage solution to help maximize storage.

Design – We will design a solution with our products to achieve the desired outcome and maximize the use of current space.

Engineering – Our engineers will provide CAD drawings and elevations for each project to ensure the customers are getting exactly what they want.

Manufacturing – We manufacture all of our products in Tatamy, Pennsylvania. We proudly stand behind the Buy American initiative and Made in America product.

Installation Services – We install all of our product with Equipto employees to provide full turn-key solutions to achieve the space solution you have desired and to ensure that your project is a positive experience.

The Background

Gerald Witmer, Administrative Director of the Reading Muhlenberg Career & Tech Center, had first-hand experience relating to the quality of Equipto products. When the day came to renovate and expand RMCTC, one of the first companies Mr. Witmer turned to was Equipto. Having a “hodgepodge” of work benches, desks, lockers, and shelving in all of his current classrooms, (some dating back to the late 60’s) in various states of disrepair, Mr. Witmer made the decision to replace much of his antiquated equipment with new, state of the art, Equipto products.

The Project/Solution

Equipto began a month long evaluation process to determine the best space utilization solutions for a 31 classroom career & technology center. Nearly all products in Equipto’s multi-line offering were considered with most being incorporated into RMCTC’s renovation. Equipto designed, engineered, produced, and installed new equipment at RMCTC and the end results have proven to be a success for both faculty and students. An Equipto Mobile Aisle Storage System, V-Grip shelving, Work Benches, Work Centers, Modular Drawers, and Bulk Shelving, are just some of the systems installed at RMCTC.

Safety Training Room

WHY CHOOSE EQUIPTO??

- Versatility for complete customized, Reconfigurable storage and work area Solutions
- Factory trained and certified Installations/project management team
- On site consulting and layout assistance.
- Sterling past performance
- Leader in space solutions for over a century.
- All products are made and assembled In the USA

Hinged double doors for V-Grip shelving are manufactured with a rigid door and frame assembly, with sturdy hinges and 3 point latches. They attach quickly and easily to V-Grip shelving units.

Above, Reading Muhlenberg's Cosmetology Room utilizes Equipto's V-Grip Shelving with full-height lockable doors.

V Grip Bulk Rack is designed to accommodate longer spans and heavier loads than conventional shelving. Bulk Rack beams engage V-Grip upright posts providing a rigid connection. Bulk Rack levels are designed to carry load capacities from 1500lbs to 3000 lbs. per level, depending on beam span length and decking material used.

Above, Equipto's V-Grip Bulk Rack is shown in the upper storage room of Reading-Muhlenberg's Auto Repair Room. The units shown are with corrugated Steel decking and wire end grids with hooks for storage of larger car parts.

To the left, is our V-Grip shelving with drawers located in Reading Muhlenberg's Motorcycle and Small Engine Tech Room. Our V Grip upright posts have an exclusive triangular design that maximizes load bearing capability while providing a smooth front surface without unsightly holes or hardware.

Many different V-Grip components may be combined to meet specific applications. These components include , but are not limited to, heavy duty Steel shelves, wire shelves, modular Drawers in 48 different sizes with Capacities of 200 or 400 lbs., full or partial Height dividers to create custom storage Bins, as well as bulk rack options.

Reading Muhlenberg's
Carpentry Room

Equipto's open leg workcenters are a simple and convenient way to achieve efficient work space with economy and endurance. These basic units are designed to boost your productivity over years and years of demanding use.

Auto Body Repair

To the left, students in Reading Muhlenberg's Auto Body Repair Program, work on car parts on an Equipto open leg workcenter.

In addition to manufacturing open and closed leg workcenters, Modular drawer cabinet workcenters, adjustable height Iron-I workcenters and tear down benches, Equipto also manufactures Pedestal Workcenters. These are shown above with students in Reading Muhlenberg's Plumbing and Heating Program. These Pedestal benches offer the perfect bench/cabinet combination and feature strong, rugged work surfaces, lower shelf space and lockable cabinets and drawers. Customize with accessories and over 180 combinations of height, length, depth and top surfaces.

MOBILE AISLE SYSTEMS

- Modular design facilitates easy assembly, allowing future reconfiguration and expansion
- Mobile carriages are rated to carry a max of 1000 lbs. per linear foot
- Mechanical-assist controls enable operator to move 10,000 lbs. with minimal effort
- Accommodates all versatile V-Grip shelving and rack components

Avoid the cost of new construction by doubling storage capacity in the same footprint. Free valuable floor space for other operations without sacrificing storage capacity. Integration with V-Grip maximizes flexibility to store small and bulk items together.

The Equipto Tech Bench combines essential service facility equipment and Hi-tech storage functionality to organize every aspect of a technician's workspace.

Toyota Dealership

To the left, in Reading Muhlenberg's Motorcycle & Small Engine Tech room, is an Equipto Tech bench with wall mounted upper cabinets, adjacent to an Equipto Tire Rack.

EQUIPTO ADVANTAGES:

- From design to manufacturing to installation, we provide all services in-house with certified Equipto employees
- All projects are customizable to your space and needs
- Storage and work areas are versatile and completely reconfigurable
- All of our products are manufactured and assembled in the USA
