In today's world of first responder requirements for reaction time and preparedness, the need for efficient, flexible, reconfigurable, and deployable storage, and work area solutions is critical. Equipto - DBA Consolidated Storage Companies - through

over 100 years of experience in designing and manufacturing solutions for both military and civilian contractors and end users, stands ready for the ever changing demands of this theatre of operations. From PPG storage to on site vehicle inspection and decontamination platforms, Equipto has a solution.

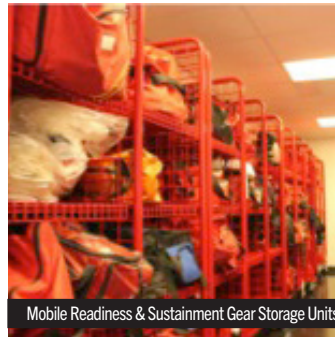

Storing the gear and equipment of first line responder personnel is one of Equipto's specialties. Keep all gear clean, maintained, secure, and ready for immediate response and deployment. Equipto's "relocatable" and limitless end user configuration capabilities allow the DOD or Local First Responders to go from training/home storage solutions to having a fully deployable solutions. This is done by training/home storage solutions being inserted into any container and immediately sent down range within 48 hours.

Deployment Cases
