Equipto's New ISU90 and TRICON Storage Platform Product Line

In response to strong demand from several branches of the Military, Equipto has designed and built for several US Military bases, a new approach to storing and accessing ISU 90 and TRICON containers.

Key advantages of the new Equipto ISU90 and TRICON Storage Solution:

- Doubles storage space for ISU90s and TRICONS
- Even with higher density, still permits access to any Storage Container at any time using the special floor conveyor system
- No longer need to store the units outside, with the resulting damage to the storage container as well as the contents
- Solution does not require any modification to the building

An ISU90 is a standard military container with dimensions of 108"W x 88"L x 91.35"H. Typical weight of the container – 1,720 lbs. Capacity 10,000 lbs. Typically, four doors on each 108" side.
