

Need to Install, Relocate or Modify your current Equipto Storage Solution? Equipto Installation Services is here to help.

Having purchased the highest quality storage solutions available on the market from Equipto -- sometimes you need help in getting it all set up -- especially if it is a multi-level or mobile aisle application.

Recognizing this need, Equipto began our own Installation Service Division providing quality, turn-key services on our full line of products throughout the United States. Whether it is a complex parts room incorporating a mezzanine, mobile aisle, work centers and modular drawer cabinets or a short run of shelving, Equipto has the right team for you.

With this newly formed group, Equipto has had great success with providing professional installations of our product line to our distributors and customers. It is a value added service for those large and small projects that our customers can use to help their projects go together easier without the hassle of reading prints and assembly instructions. It can also be valuable when relocating or updating a system as well.

Over the last 18 months, use of our Installation Services Division has grown and we continue to add additional crews. We have provided Intallation Services throughout the United States, Mexico, Japan, and Korea and are able to send a team of trained and experienced installers anywhere in the world.

Please make sure your District Sales Manager or Government Sales Manager includes it in your next

quote to get the best out of your new Equipto storage solution.

Thank you for your business and your continued loyalty to our products. Please contact Randy Prinder, Vice President of Sales with any questions, (484) 274-9373 or rprinder@equipto.com.
