Supplying all the pieces for a complete storage solution!

EQUIPTO is ready to become your partner in space storage and utilization products!

Recognized for innovation, quality and service, Equipto storage equipment is proudly manufactured in Tatamy, PA. Equipto's employee philosophy is to make it as simple as possible to do business with them.

It all began in 1907, when Thomas M. Dunham began developing motorcycle headlights and sidecars in Aurora, Illinois. With the increase in automobile production, motorcycle parts soon were not in such high demand, so Equipto began producing body parts for Ford Motor Company's Model T Chassis. As the relationship with the car industry flourished, Dunham began hearing other needs within the automotive industry. One car dealer needed heavy-duty shelving to store large, heavy car parts and the idea for space storage and utilization was born.

As the company continues to be innovative, new products and systems are constantly being designed and brought to the market. Equipto can be your single source for the largest offering of Innovative Storage Solutions. Products we proudly manufacture include: Shelving and Racks, Modular Storage Cabinets, Small Parts Storage Systems, Mobile Aisle Storage Systems, Platforms and Mezzanines, Stairways and Crosswalks, Workcenters and Workbenches, Storage Cabinets, Transport Carts, and Military Storage Systems. Equipto manufactures a high quality product for which we proudly stand behind and provide a limited lifetime warranty.

After more than 100 years, Equipto's customer base reaches across the U.S. and into many markets. As Equipto continues to grow and introduce new product lines, customers can expect the same innovation and quality that has made Equipto what it is today:

"The industry leader in space storage and utilization products!"

Equipto's Vision

Our company vision is to be recognized by our customers as a world-class supplier of industrial storage designs and solutions.

With the broadest line of storage solutions, our goal is to develop long-term partnerships with our customers as their storage requirements continue to expand and evolve.

We will accomplish this by:

- The best people, who are customer focused and driven.
- The best engineered products, which stand alone or are integrated into a system.
- Consistent production of superior products.

Shelving

V-Grip™ Shelving - components

Structural Integrity comes from the integration of Equipto's exclusive V-Grip™ upright post and heavy-duty, compression-fit components. When ordering V-Grip™ shelving by component, remember:

- 1) Shelving uprights can be shared and any number of units can be joined together in continuous row applications. A complete run of shelving only grows 1^{5/8"} no matter the length of the run.
- 2) Back sway braces and solid back panels can be shared between back-to-back units.
- 3) Closed shelving ends and solid back panels are finished in standard reflective white paint to enhance visibility in parts storage areas.
- 4) V-Grip™ shelves are heavy duty, 18-gauge steel and are provided with 4 corner reinforcements per shelf, which provide a friction fit to V-Grip™ upright posts.

V-Grip™ Bulk Rack

V-Grip Bulk Rack is designed to accommodate longer spans and heavier loads than conventional shelving. Bulk Rack beams engage V-Grip upright posts providing a rigid connection. Bulk Rack levels are designed to carry load capacities from 1500 lbs. to 3000 lbs. per level, depending on beam span length and deck material used.

The units to the right are shown with wire decking for the top shelf and corrugated steel decking unit bottom shelf.

3 1/8" High shelf drawers

One-piece construction with curved handle, reinforced fronts; label holders (full-width on fronts) on both drawers and dividers; embossed bottoms for easy sliding; front and rear drawer stops for pull out, tilt down part retrieval. Insert individual drawers and small cabinets in shelving; stack cabinets high and wide — along walls — back-to-back for partitions — or in rows.

Hundreds of combinations are available for inserting drawers and drawer cabinets into existing shelving (individual drawers shown here.) For example, arranging #8539, #8563 and #8566 drawers in 8-across, 4-across and 3-across patterns converts 36" wide shelf to clean, safe drawer units. Create in-shelf drawers wherever you need them, without replacing existing shelving.
