Bryan Gullett
(bgullett@equipto.com)
(910) 546-7920
NC, SC, GA & TN

AFTER EQUIPTO

Project Description:

Equipto Mobile Aisle System with V-Grip Bulk Rack Shelving

- Mobile Aisle System dimensions : 17'Wx8'Dx84"H
- Open/mechanical style drive
 - Open style drive columns were chosen on this project to provide the greatest visibility of the items being stored on the mobile aisle system while also keeping the project the most cost effective
 - Non-grout track system with leveling adjustments. A bolt together, groutless platform leveling system easily allows for relocation or addition to existing system
- V-Grip Bulk Rack Shelving Units
 - 4 levels each unit
 - Medium duty beams with over **1100 lbs. of load capacity per shelf**
 - Both wire and solid steel decking options utilized on this system
 - V-Grip shelving units were used on both the mobile aisle system and statically in the room along the wall. This ensures static shelving units the option of integration into the mobile system if future growth is needed and additional space is made available to increase the current system.

Impact of the new system provided to MeadWestvaco

Old layout vs. New layout:

BEFORE EQUIPTO

- Doubled storage capacity in room's same footprint. This freed up valuable floor space for moving items in and out of the room and ultimately creating a safer, more efficient work environment for employees

- Old layout consisted of 36 usable shelves - new layout provides shelving space equivalent to 72 usable shelves

AFTER EQUIPTO

We value your business and thank you for your continued support of our product line. Please share with us your Equipto success stories.
